Market Gardeners

Serving the Critical Market Gardener Trade for Over a Quarter Century

SEED ANNUAL

NEW BO-KAY (Rutger's Certified)

Our new improved selection of Rutger's Certified,
our outstanding main-crop tomato the last 14 years.
(See Page 22)

Andrews-Burri Seed Co.

505 WALNUT STREET

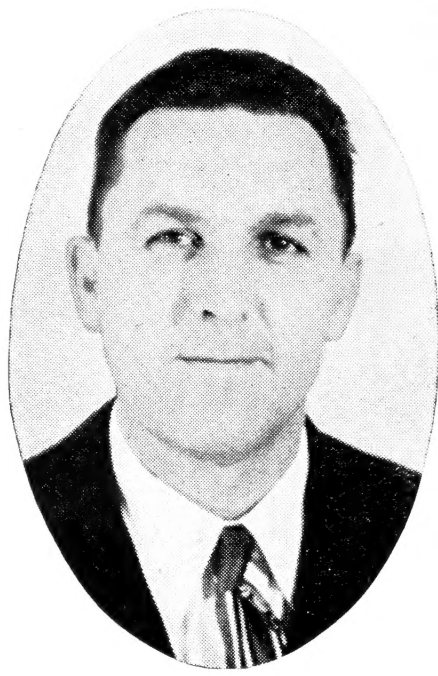

--

KANSAS CITY 6, MISSOURI

To Our Friends and Customers

C. C. ANDREWS

W. F. HUEBNER

FOR MANY YEARS the bulk of our business has been with the market gardeners, supplying them with the best the market affords. We are constantly on the alert for new and better varieties. We have been fortunate in giving our trade many of the outstanding varieties of today and you can rest assured that we will constantly endeavor to give your needs our first consideration as to quality and service.

We specialize in quick service and pride ourselves in shipping your order the same day it is received. We have been doing this for years.

We pledge anew this service!

ASPARAGUS

MARY WASHINGTON

The best of several rust resistant strains, green color with purple tips, large attractive spears, heavy yielder.

BEANS

BUSH BEANS — GREEN POD

BLACK VALENTINE STRINGLESS, ASGROW STRAIN

52 Days

Excellent shipping variety, used extensively in all sections.

VINE—16 to 18 inches tall, erect, foliage of dark green color.

PODS—6½ to 7 inches long, slender, thick oval, almost straight, stringless, very attractive green color.

BURPEE'S STRINGLESS GREEN POD

50 Days

Very early, productive, hardy and vigorous, an older variety for home, market and canners.

VINE—16 to 17 inches tall, dark green, hardy, vigorous and productive.

PODS—5½ to 6 inches long, medium dark green, slightly curved, stringless, fiberless, round, of excellent quality and flavor.

LOGAN

51 Days

Resistant to powdery mildew and bean mosaic. Excellent for fall crop.

VINE—16 to 18 inches tall, erect, sturdy, medium green bush with heavy setting of pods in center of plant.

PODS—6 to 7 inches long, fine textured flesh, smooth, round, straight, stringless and fiberless, medium dark green.

COMMODORE IMPROVED (Dwarf Kentucky Wonder)

63 Days

VINE—16 to 18 inches, bushy, erect, coarse leaflets, vigorous and productive.

PODS—8 to 9 inches long, round, slightly curved, almost stringless and fiberless, medium dark green, tender, brittle, very good quality.

CONTENDER

50 Days

Resistant to common bean mosaic and powdery mildew, it is widely adapted and a good yielder.

VINE—12 to 18 inches tall.

PODS—Thick oval, nearly round, 7 inches long, medium green, stringless and tender, fiberless.

TENDERGREEN

53 Days

Highest quality, all purpose bean.

VINE—15 to 16 inches tall, very erect, compact, coarse, dark green foliage, heavy producer.

PODS—5½ to 6 inches long, round, curved at tip to straight, stringless, fine textured flesh, tender, medium to dark green color.

TOPCROP

49 Days

A new tender green type. Immune to common bean mosaic and tolerant of "greasy pod".

VINE—15 to 16 inches tall, erect, vigorous, medium light green, well branched.

PODS—5 to 5½ inches, round, slightly curved, smooth, slightly creaseback in later stages; flesh thick, entirely stringless and without fiber, medium dark green.

BUSH BEANS — WAX POD

CHEROKEE WAX

50 Days

Developed from a selection of old Black Valentine Stringless and is probably the most prolific of the wax podded varieties.

VINE—16 to 18 inches tall, vigorous, erect, prolific.

PODS—6½ to 7 inches long, oval, almost straight, stringless, tender and of good quality.

UNRIVALLED WAX

52 Days

Immensely productive and excellent shipper.

VINES—12 to 14 inches, stocky, vigorous, dark green and productive.

PODS—5 to 5½ inches long, semi-round, straight, tender, stringless, attractive pale yellow.

BUSH BEANS — LIMA

FORDHOOK 242

75 Days

Uniform, heavy yielding and dependable. A highly productive Fordhook type for adverse conditions.

VINE—16 to 19 inches tall, erect, compact, bushy, dark green.

PODS—3½ to 4 inches long, slightly curved, plump, medium green.

POLE BEANS — GREEN POD

WHITE CORNFIELD IMPROVED (Kansas Wonder)

65 Days

One of the finest varieties available for use as a green snap or dry shell bean in the home or market garden. A good shipper.

VINE—5 to 6 feet tall, a good climber, hardy.

PODS—8 to 9 inches and longer, medium green, straight, round, creaseback, fleshy, brittle, few strings, very good quality.

KENTUCKY WONDER 191

64 Days

Developed by the USDA, a market garden variety, shows resistance to bean rust.

VINE—6 feet tall, vigorous, productive, with broad, dark leaves.

PODS—8 to 9 inches long, oval, tender and stringless at market stage.

BEETS

ASGROW WONDER

50 to 52 Days

TOPS—12 to 14 inches, glossy medium green, medium broad leaf, medium collar.

ROOTS—2½ to 3 inches in diameter, dark red, smooth skin, with small tap root, flesh tender and dark red.

BOSTON CROSBY (Matchless) (A&B Special)

55 Days

A fine globe shape for early bunching, as well as for main crop.

TOPS—15 to 18 inches tall, light to medium green.

ROOTS—Globe shape, dark red, flesh rich deep red without light zones, smooth skin, small tap roots.

DETROIT DARK RED

58 Days

Popular all purpose beet, fine quality and good keeper.

TOPS—18 to 22 inches tall, glossy dark green tinged maroon.

ROOTS—Globular, dark red and smooth, interior very dark red, brittle flesh.

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

ECLIPSE LIGHT STRAIN

60 to 65 Days

TOPS—15 to 17 inches, fairly coarse, light green leaf, smooth blade.

ROOTS—Flattened globe shape, of medium size, light red, interior dark red with lighter zones.

TALL TOP EARLY WONDER

60 Days

A selected strain of Early Wonder, very popular where tops are used for greens.

TOPS—Tall, upright.

ROOTS—Flattened globe shape with small tap root, dark purplish red, zoned with a lighter shade.

BROCCOLI

DICICCO

55 to 60 Days

PLANTS—Medium tall, 2 feet, bright green, very productive.

HEADS—3 to 5 inches in diameter, light green and compact, it develops a high percentage of side shoots for further picking.

ITALIAN GREEN SPROUTUNG

60 to 70 Days

Best sprouting Broccoli for home and market.

PLANTS—24 inches tall, blue green, erect and leafy.

HEADS—3 to 4 inches in diameter, with bluish green, compact bud clusters.

CABBAGE

YELLOWS RESISTANT

WISCONSIN GOLDEN ACRE (Earliest of All)

63 Days

A Yellow resistant selection from Golden Acre, color more blue-green, more compact and slightly smaller.

PLANT—10 inches tall, compact, dark blue-green cup shaped leaves.

HEAD—6 inches in diameter, weight 5 pounds, round to deep round and solid.

DETROIT RESISTANT

67 Days

PLANT—9 to 12 inches tall, short stem, blue-green and leafy.

HEAD—6 to 7 inches in diameter, weighing 3 to 3½ lb., globular to slightly flattened, solid white interior.

RACINE MARKET

70 Days

PLANT—10 to 12 inches tall, compact, short stemmed, blue-green color.

HEAD—6½ inches in diameter, round, solid, good quality.

WISCONSIN COPENHAGEN

70 Days

PLANT—11 to 14 inches tall, short stemmed, compact, erect, few outer leaves, medium light green, cup shaped.

HEAD—6 to 7 inches in diameter, weight 3 to 4 lbs., solid and globe shaped.

MARION MARKET

75 Days

A heavy yielding mid-season cabbage.

PLANT—12 to 16 inches tall, medium stemmed, blue-green foliage.

HEAD—6 inches in diameter, weight 5 to 6 lbs., round compact.

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

GLORY OF ENKHUIZEN

80 Days

PLANT—12 to 16 inches tall, medium short stem, yellow green leaf.

HEAD—6 to 7½ inches in diameter, weight 5 to 6 lbs., flattened globe, fairly compact.

GLOBE

83 Days

PLANT—10 to 15 inches tall, large, vigorous, medium green.

HEAD—6 to 7 inches in diameter, weight 7 to 8 lbs., compact and globular.

WISCONSIN BALLHEAD IMPROVED (Evergreen Hollander) (Danish Ballhead)

100 Days

Latest introduction in the disease resistant cabbages. Produces a heavy yield of late cabbage for storage, shipping and kraut.

PLANT—Medium to large size, large, bluish-green.

HEAD—7½ inches in diameter, weight 8 lbs., large, globular to flattened globe-shape, blue-green color.

STANDARD VARIETIES

PRIDE OF DENMARK

62 Days

Early, resembling the Golden Acre varitey, and, like Copenhagen, is not suitable for storing, although will keep for 60 days in prime condition after maturity. For an early crop it has no equal.

PLANT—Medium size, short, upright leaves.

HEAD—Weight 3 to 5 lbs., round, solid, uniform and excellent quality.

ELITE GOLDEN ACRE

65 Days

PLANT—Uniform, short stem, short leaves, light green.

HEAD—6 to 6½ inches in diameter, weight 3 to 3½ lbs., golden green, globular.

GOLDEN ACRE

66 Days

Most popular of the round-headed early varieties.

PLANT—11 inches tall, medium green, very compact and fast growing, short stemmed.

HEAD—6 to 7 inches in diameter, weight 3 to 3½ lbs., round with white solid interior.

COPENHAGEN MARKET

68 Days

PLANT—11 to 14 inches tall, erect, compact, short stemmed, medium light green and cup shaped.

HEAD—6 to 7 inches in diameter, weight 3 to 4 lbs., globe shaped and solid.

BONANZA

75 Days

An outstanding shipping and market varitey. Forms a small firm head early in the season and continues to grow to maximum size. Can be havested early when market is strong and can also be held in the field for a considerable time after maturity, without loss, if market conditions are unfavorable.

OAKVIEW BALLHEAD

110 Days

A truly wonderful cabbage of the later varieties, somewhat similar to Ferry's Hollander in growth and season, but more uniform in size and darker green. Much superior to any other variety as to quality.

HEAD—8 inches in diameter, weight 8 lbs., firm and solid.

RED CABBAGES

RED ACRE

75 to 78 Days

The earliest red cabbage. Red Acre is remarkable for its ability to stand a long time, without splitting, even under adverse weather conditions.

PLANT—Type of Golden Acre, but more leafy.

HEAD—6 to 7 inches in diameter, weight 3 to 5 lbs., solid.

RED METEOR

80 Days

Medium early red cabbage for general use. A dependable header of uniform size and shape.

HEAD—6 inches in diameter, weight 4 lbs.

RED HOLLANDER, YELLOWS RESISTANT

100 Days

Heads mature fast for early cutting, if desired. Good late cabbage for shipping and storage.

PLANT—13 to 15 inches tall, dark red.

HEAD—7 inches in diameter, weight 6 lbs., round to globe shape.

CHINESE CABBAGE

CHIH LI

70 to 75 Days

Imported. This is the best and most popular for market and roadside stand. A profitable crop for both muck and upland, as it commands a ready market and can be held in storage for winter sales.

PLANT—20 inches tall, pale green leaves with upright growth.

HEAD—16 to 20 inches long, 3½ to 4 inches in diameter, long and cylindrical with a firm, crisp interior.

MICHI LI

70 Days

PLANT—Exceptionally sure heading, vigorous.

HEAD—18 to 20 inches long, 4 inches in diameter, long cylindrical firm head, with crisp, fine flavor.

CARROTS

CHANTENAY SPECIAL

68 Days

It has held its great popularity on merit alone, for it has a beautiful appearance and excellent table quality.

TOP—15 to 20 inches tall.

ROOT—8 inches long, 2 inches wide at shoulder, tapered and stump rooted.

IMPERATOR

77 Days

A popular bunching variety with market gardeners and shippers.

TOP—16 to 20 inches tall.

ROOT—8 inches long, 2 inches wide at the top, long, tapering, semi-blunt, smooth and deep orange color.

IMPERATOR, LONG TYPE

77 Days

An improved Emperor with longer and more slender roots. Easy bunching and attractive appearance make this a long-type leader.

TOP—16 to 20 inches tall and strong.

ROOT—9 to 11 inches long, 1½ inches wide at shoulder, tapering to a nearly pointed tip, smooth and deep orange color.

IMPERIDA (New)

77 Days

A new shipping type, tops are definitely shorter than Imperator.

ROOT—8 inches long, $1\frac{1}{2}$ inches in diameter, flesh mild, sweet flavor, good texture, orange color.

SHORT TOP SHIPPER (Airliner)

75 Days

TOP—short, dark green, and strong.

ROOT— $7\frac{1}{2}$ inches long, $1\frac{3}{4}$ inches in diameter, bright orange, good quality.

STREAMLINER (California Bunching Type)

80 Days

TOP—Short, erect and rather coarsely cut, with thick stems.

ROOT—8 to 9 inches long, $1\frac{1}{4}$ inches in diameter. Deep orange with small self-colored core.

TOUCHON (Coreless XXX)

70 Days

This variety is by far the earliest of its type, but its earliness does not affect, in any way, its size or quality.

TOP—12 to 14 inches, very refined foliage, small collar, medium strong.

ROOT— $6\frac{1}{2}$ to 8 inches long, $1\frac{1}{4}$ inches in diameter. Cylindrical and bright orange.

CAULIFLOWER

EXTRA EARLY SNOWBALL

Unquestionably the earliest maturing strain of the Snowball type. The best early strain for forcing and especially adapted for the very critical market gardeners.

PLANT—Dwarf, compact, upright leaves, pale blue-green, short leaved.

HEAD— $5\frac{1}{2}$ to $6\frac{1}{2}$ inches across, weight $1\frac{1}{4}$ to 2 lbs.

SUPER SNOWBALL

Our Super Snowball is the best strain grown. It is about two days later than our Extra Early Snowball and, under favorable conditions and weather, it produces a wonderful yield of large, compact, beautiful heads, well protected with leaves which curl over the head. In a way quite distinct from other strains. Heading very uniform, so crops can be harvested within two or three weeks.

PLANT—Dwarf, compact, upright, inner leaves curl over head.

HEAD—6 to 7 inches across, weight $1\frac{3}{4}$ to $2\frac{1}{2}$ lbs., deep, solid, compact, snowy white, of superior quality and flavor.

WHITE EXCELSIOR

Is a somewhat more vigorous type than the Snowball class and selected to produce a larger head than Snowball without losing materially in earliness. After we introduced this new type, result of close co-operation between our breeding department and a prominent Market Gardener, it conquered the market by leaps and bounds, and we feel perfectly sure it will meet with instantaneous favor in your locality. This new strain will mature with great evenness and, although Snowball will perhaps give a few forerunners a couple of days before White Excelsior makes its start, the bulk of the crop is nearly as early and harvesting may be completed 120 days after sowing. The pure white heads are remarkable for their depth and unexcelled white color. The curd is of fine texture and resistant to a high degree to "riciness" and "fuzziness". Also, heads in which small green leaves appear will be sought in vain. We are

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

sincere in believing that White Excelsior ranks as one of the very superior stocks of cauliflower available at any price.

PLANT—Dwarf and compact in growth, with long upright leaves.

HEAD—6½ to 7 inches in diameter, average weight 3 lbs., flattened pure white curds free from leaflets.

WHITE MOUNTAIN

Because of its unusual qualities and resistance, has displaced nearly all of the other varieties where in competition. A strong growing variety of the Snowball type, producing larger and deeper heads and with no unusual growing hindrances will make very ample foliage with overlapping leaves over the head as a protection to the snow-white heads in its forming. The heads are of great depth and pure white color, green leaves rarely appear in the head. 15 years experience prompts us to say that White Mountain will produce 25 to 30 percent more number one marketable heads than most other varieties. White Mountain is in a class of its own and is the perfect main crop flower.

PLANT—Slightly larger than Snowball, with tall, erect, medium green outer leaves.

HEAD—7 to 10 inches in diameter, and weighs from 3 to 5 lbs., with large, deep, snow white curds.

DANISH GIANT

Our strain is very even and a perfect type of this valuable variety. This is a large, late flower for the South, with heavy protecting foliage.

CELERY

UTAH 10B

A leading variety of Pascal for shipping. Plants are 26 to 28 inches tall, leaves moderately large, medium dark green. Plants are erect and compact. Stems are 8 to 10 inches long, of uniform length, rounded, thick, waxy in appearance, blanches readily, tender, crisp, and of excellent quality.

UTAH NO. 15

This strain of Utah is becoming increasingly important with Eastern and Northern growers. Plants are large, 26 to 28 inches tall, leaves are dark green, deeply cut, medium broad, erect, compact and full hearted. Stems are 8 to 10 inches long, numerous, medium width, thick, rounded and smooth, crisp and fine quality. Tops retain dark green color when grown on muck soil.

MICHIGAN GOLDEN

A yellows resistant strain grown and put in sealed packets at the Michigan State College. It is of the Golden Plume type, of medium height, medium long stems, and very easy blanching. Stands hot weather well.

COLLARDS

GEORGIA

70 to 80 Days

A most hardy sort to withstand severe weather conditions. A non-heading type of the cabbage family, which forms a rosette or loose cluster of tender leaves at the top of a large plant, 2 to 3 feet in height. A splendid green. Generally grown in the south and adapted to conditions where cabbage will not grow.

HYBRID SWEET CORN

SENECA 60

63 Days

Those who have grown Seneca 60 will find our new Seneca 60 the earliest of all hybrids, very uniform, equally productive, and much higher quality than our former strain.

STALK—4 to 4½ feet tall, erect.

EARS—6½ inches long, 10 and 12 rowed, slender.

KERNELS—Yellow, medium wide, medium deep, tender, and excellent quality.

SENECA 60 X C13

65 Days

A new, wilt resistant, Hybrid for those sections where bacterial wilt is prevalent.

STALK—4½ to 5 feet tall, a vigorous grower.

EAR & KERNEL—7 inches long, 10 to 14 rows, yellow kernel of fair quality.

SENECA DAWN

66 Days

A large eared, extra early Hybrid.

STALK—4½ to 5 feet tall, strong, upright.

EAR & KERNEL—7½ inches long, 12 to 16 rows, medium yellow, fair quality.

SPANCROSS C13X3

68 Days

One of the best early Hybrids, highly resistant to bacterial wilt.

STALK—5½ feet tall.

EAR & KERNEL—6½ inches long, small ears of 10 to 12 rows, golden yellow, sweet and tender.

EARLY MARCROSS

70 Days

An early mid-season yellow wilt-resistant corn.

STALK—5 to 6 feet tall.

EAR & KERNEL—Ears long, plump, slightly tapered, 10 to 12 rows, light to medium yellow, medium depth, good flavor, and good quality for market gardeners.

SENECA GOLDEN

72 Days

Seneca Golden is an extremely uniform early strain of Golden Cross and fills a period between early and mid-season varieties.

STALK—5½ feet tall, and produces 2 marketable ears on nearly every stalk.

EAR & KERNEL—7 inches long, uniformly 12 rowed with deep, rich golden kernels on small cob. If harvested when ready, quality is excellent.

CARMELCROSS

74 Days

Developed by the Connecticut Experiment Station for market and home garden. Vigorous and heavy yielding.

STALK—5 feet tall, rugged, very leafy, with medium suckering and erectness.

EAR & KERNEL—8 inches long, 12 to 14 rows, well filled with medium yellow kernels of very good quality, ears have excellent steamer leaves.

TENDERGOLD

78 Days

STALK—6½ to 7 feet tall, medium dark green.

EAR & KERNEL—7 to 8 inches long, 10 to 14 rows, straight rows, well filled tips, medium yellow, medium deep, good flavor and quality.

GOLDEN CROSS BANTAM

82 Days

Long a popular and widely adapted variety.

STALK—6½ to 7½ feet tall, medium green.

EAR & KERNEL—7½ to 8 inches long, very uniform, 12 to 14 rows, straight rows, rich yellow, medium deep, excellent flavor and quality.

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

IOANA

84 Days

An attractive Hybrid, highly resistant to wilt.

STALK—6½ to 7½ feet tall, dark green, heavy stalk, well rooted.

EAR & KERNEL—8 to 8½ inches long, very uniform, cylindrical with rounded tip, 12 to 14 orws. Light yellow, medium deep, tender and excellent flavor.

SENECA CHIEF

86 Days

You ahve never tasted top quality sweet corn until you have eaten SENECA CHIEF. Resistant to bacterial wilt.

STALK—6½ to 7 feet tall, sturdy, leafy.

EAR & KERNEL—9 inches long, 12 rowed with deep narrow kernel, exceptionally tender, and best flavored variety.

IOCHIEF

89 Days

A very productive yellow hybrid, drought resistant, vigorous, virtually suckerless, and bears ears on high stalks.

STALK—7½ feet tall, very uniform, frequently 2 ears per stalk.

EAR & KERNEL—8½ inches long, 14 to 18 rows, slightly tapered. Bright golden yellow, narrow, tender and of fine flavor. Holds well, uniform in size, large and attractive.

CUCUMBERS

BURPEE'S HYBRID

60 Days

High resistance to mosaic and downy mildew are the outstanding attributes of this 1st generation (F1) hybrid white-spine slicing cucumber.

VINE—Extremely vigorous, long lived, and bears abundantly.

FRUIT—8 inches and more long, 2½ inches wide, square at both ends, with medium seed cavity and crisp white lfesh of excellent quality.

A & C or COLORADO (Wondergreen)

68 Days

Holds color well and recommended for slicing. A good shipper.

VINE—Vigorous, leaves dark green and broad.

FRUIT—8 to 10 inches long, 2½ to 3 inches thick, slight taper at ends, dark green, small seed cavity, white spine.

CUBIT

63 Days

This variety is of the A & C and Colorado class. Excellent shipper.

VINE—Fairly vigorous, leaves dark red and of medium size.

FRUIT—8½ inches long, 2 to 2½ inches thick, cylindrical, with blunt ends, dark green, flesh thick, small seed cavity, white spine.

LONGFELLOW (Our Wonderful)

72 Days

This wonderful strain of Longfellow is beautiful in appearance, an ideal for market.

VINE—Vigorous, medium green, large leafed.

FRUIT—12 inches long, 2½ to 3 inches thick, straight, well shaped, dark green, thick flesh and small seed cavity, white spine.

MARKETER

65 Days

A high yielding variety, somewhat on the order of Straight-8, holds its dark green color exceptionally well. Outstanding in yielding ability as prolific vines

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

throw an exceptionally large number of female blossoms per plant. Stands heat better than most varieties.

VINE—Very vigorous, dark green medium sized leaves.

FRUIT—8 to 10 inches long, $2\frac{1}{4}$ inches in diameter, long, slim, uniform, taper at stem end and fairly rounded blossom end, dark green, smooth, solid white flesh, small seed cavity, white spine.

STRAIGHT 8

66 Days

A fine shipper and splendid as a slicer for home garden.

VINE—Vigorous and productive, large dark green leaves affording good coverage.

FRUIT—8 inches long, 2 inches in diameter, white spine, straight and cylindrical, with blunt ends, deep rich green.

NIAGARA (New)

65 Days

This variety was developed by Dr. Henry Munger, Cornell University, and is the first slicing variety that is resistant to cucumber mosaic. In comparative trials, Niagara shows the same plant, vigor, and larger leaf construction that you find in Hybrids. The fruit is white spined, shaped like Cubit, being blunt on the blossom end, it is very dark green in color at picking stage, also through its development, very small seed cavity. The flesh is white, crisp, tender and of excellent quality. The cucumber varies from $7\frac{1}{2}$ to 10 inches in length, being straight, cylindrical, and of excellent dark green color. The vine is vigorous, the leaves are much larger than normal varieties, and the plant stands up under adverse conditions better than normal varieties. It also is good in getting away fast in the spring, and it has shown practically a total resistance to cucumber mosaic. We have observed this cucumber both here and in other states and it performed excellently, in fact, it showed nearly as well as Hybrids. It is in season with Cubit and Marketer. Due to its mosaic resistance, it is an excellent fall cucumber.

EGGPLANT

BLACK BEAUTY

80 to 85 Days

The best of all large fruited eggplants. Excellent for market, retaining perfect color long after picking.

PLANT—30 to 36 inches tall, hardy, upright, compact growth, heavily productive.

FRUIT— $5\frac{1}{2}$ to $6\frac{1}{2}$ inches long, oval shape, blunt ended, blackish purple in color, uniform shape and good quality.

FLORIDA HIGH BUSH

85 to 90 Days

This is a heavy yielding stock. This variety resists drought, blight, and wet weather better than most varieties.

PLANT—30 to 40 inches tall, very erect, heavy stemmed, holding fruit well above ground, long obovate leaf, bear 2 to 6 fruits.

FRUIT—Dark purple, elongated egg shape tapering gradually to stem end, smooth, good shipping variety.

FORT MYERS MARKET

85 to 90 Days

Well known for its ability to withstand drought and for the fine appearance and market acceptance of the uniform medium sized, dark, glossy fruit.

PLANT—30 to 36 inches tall, hardy, upright, compact growth, heavily productive.

FRUIT—Bell shaped, $5\frac{1}{2}$ to $6\frac{1}{2}$ inches by 6 to 8 inches long. Very deep purple, smooth and rarely lobed.

NEW HAMPSHIRE HYBRID

68 to 72 Days

Adapted by the New Hampshire Experiment Station for a crop in short season areas. Earliest strain.

PLANT—12 to 16 inches tall, spreading, heavily branched, medium sized leaves, bear 5 to 8 fruits, very productive.

FRUIT—Dark purple, blocky egg shaped, smooth, glossy.

ENDIVE

FULL HEART BATAVIAN

85 to 90 Days

The commercial escarole, plant medium large, with full, compact, well blanched heart. A more vigorous, earlier and more uniform strain than old Broad Leaf Batavian.

LARGE GREEN CURLED (Pink Ribbed)

95 to 100 Days

A late, coarse toothed variety of good size, mid-ribs of the outer leaves are tinged with rose. The dense mass of deeply divided leaves formed in the center blanches very readily to a rich cream color.

PRESIDENT or GOLDEN HEART

100 Days

Imported giant green curled variety. A remarkable new curled endive and the largest of all varieties, measuring 22 inches across. It is one of the hardiest kinds and withstands fall rains and early freezings. This endive has a dense and full heart, easily and quickly blanching, and is very finely curled. For truckers, one of the best varieties.

DILL

LONG ISLAND MAMMOTH

Plants 2 to 2½ feet tall. Annual plant. Extremely cut leaves. Seed very flat, brown, with strong bitter flavor. Entire plant carries mildly pungent flavor.

KALE OR BORECOLE

BLUE SCOTCH (Dwarf)

55 to 60 Days

12 to 15 inches tall, upright, leaves large and finely curled. Plants of dwarf habit and the much desired bluish-green color.

DWARF GREEN CURLED SCOTCH

55 to 60 Days

12 to 14 inches tall, leaves large, bright green, finely curled. The plant has a spreading habit, growing close to the ground and very hardy.

TALL SCOTCH

60 Days

24 to 30 inches tall, leaves large, curled and dark green. Very tender after frost. Tall stemmed Scotch type.

LONG STANDING CURLED SIBERIAN

60 Days

The green leaves are very large and comparatively plain in the center, but heavily curled on the edge. It is a fast grower, extremely hardy, and will stand longer in the spring than any other variety.

KOHL RABI

PRAGUE FORCING

52 Days

Extra for forcing. Extremely early, with small tops. Bulbs are of medium size, light green or nearly white, and of best quality for table if used when about 2 inches in diameter.

WHITE VIENNA

55 Days

Very early, having few leaves, mild flavored, smooth white bulbs of medium size and fine quality. A fine forcing variety, and can be planted closely.

PURPLE VIENNA

62 Days

Spreading plant with short green leaves with purple stems and veins. Bulb 2 inches in diameter, flattened globe shape, skin reddish purple, flesh white.

LETTUCE

BIBB

58 to 60 Days

Butter head, small loosely folded, dark green, outer leaves tixed with brown. Bolts readily in hot weather. Popular in south, and as a forcing strain in the middle-west.

GRAND RAPIDS, TIP BURN RESISTANT

42 Days

Said to be resistant to tip burn when grown commercially under glass. Leaf texture and plant type same as Grand Rapids Forcing. Has a tendency to form heads when grown outdoors, and the leaves are not so frilled but more savoyed than the regular Grand Rapids.

GRAND RAPIDS, WASHINGTON STRAIN

42 Days

This is one of the favorite forcing strains, being used by all the large greenhouse growers who recommend it as a superior lettuce. Color is light green, leaf is crisp, tender and curly. Quality of the best, there are few, if any, sprouts. Our most perfect lettuce for outdoor growing.

GREAT LAKES

82 Days

Tip burn resistant. New Iceberg type for summer growing. This variety is remarkable for its ability to stand up and produce good, hard heads even in the hot weather of mid-summer. The plants are large and vigorous, and the heads are of good size and attractive green color. They have heavy ribs and thick, crisp leaves that fold well over to make very solid, hard heads. Planted in the spring, they are ready to cut about a week later than Imperial 44, and will remain in condition for a long time after for shipping.

PREMIER GREAT LAKES

74 Days

A new development by the Pennsylvania State College. About a week earlier than Great Lakes. Uniformly large, dark green, slightly ribbed solid head. An early, smooth type of Great Lakes.

SLOBOLT

45 Days

A strain of Grand Rapids type, selected for its slow bolting character. Similar in its other characteristics to Grand Rapids and its tendency to remain in good condition for a long period makes it very desirable for either home or market gardener.

SALAD BOWL (New)

A new introduction for 1952. A head fills a salad bowl, with a perfect rosette of rich green and very decorative leaves. It is a loose-leaf variety, seems to stand up much better than Oakleaf, is a faster and larger grower, much slower to bolt, and of extremely high quality. Leaves are short and closely set, waved and notched, hold their quality, tenderness, and fine texture over a long period. This attractive novelty is a honey for home gardens, and may be packaged for fancy market trade. It has a similar appearance to endive or escarole.

MELONS

MUSKMELON OR CANTELOUPE

GOLDEN DELIGHT (New)

86 Days

Earlier than Pride of Wisconsin, larger, more productive and better flavor. FRUIT—4 to 5x5 to 7 inches, thick orange flesh, firm with good quality. Skin is slate gray, maturing to a fairly deep yellow, ribs are wide and shallow with open netting, and shape is somewhat tapering at the blossom end.

HALE'S BEST (Jumbo Strain)

86 Days

A large fruited strain of this leading variety for local markets. FRUIT—7½ inches long by 6 inches in diameter, oval, weighing 5 to 6 lbs., indistinct ribbing, heavily netted. Flesh thick, salmon orange, sweet and spicy.

HALE'S BEST NO. 36

82 to 86 Days

The best and earliest melon of the Rocky Ford Type, smaller in size than the original. One of the best for shipping and market. FRUIT—6½ inches long by 5½ inches in diameter, skin yellow-green, very little ribbing, heavily netted. Flesh thick, salmon orange, flavor sweet and spicy, small seed cavity.

IROQUOIS

88 Days

Developed with definite resistance to Fusarium wilt, by Cornell University. This medium sized melon has such uniformly fine flavor and thick flesh that it has quickly become a great favorite! FRUIT—7 inches long by 6 inches in diameter. Skin gray-green, rind hard, prominent ribs and good netting. Flesh thick, deep salmon color, fine texture, excellent quality, flavor sweet and musky. Small seed cavity.

MILDEW RESISTANT NO. 45

85 to 90 Days

A Rocky Ford variety, adapted to mildew sections, but also excellent as a shipper in all sections. This melon can be shipped long distances when fully ripe, arriving in perfect condition. FRUIT—5 to 5½x6 to 6½ inches, weighs 3 to 4 lbs. Medium size, heavy netting with faint rib. Thick salmon colored flesh, sweet, very small seed cavity.

PRIDE OF WISCONSIN (Breakfast Queen)

90 Days

A good melon for home and market garden, good shipping melon. FRUIT—6 inches long, 5½ inches in diameter, round or nearly round, hard grayish-green rind, coarsely netted, flesh thick, juicy, very sweet, and deep salmon color.

SCHOON'S HARDSHELL (Hardshell Golden Osage)

90 to 95 Days

Ideal shipping melon, having a hard rind and slow ripening. FRUIT—7½ inches long by 6½ inches in diameter, large, oval with flattened ends, prominent ribs and coarse netting, gray-blue skin. Flesh thick, salmon colored, solid and of excellent quality.

WATERMELONS

BLACKLEE CERTIFIED

95 Days

A good shipper, very resistant to Fusarium wilt, and good eating quality.

FRUIT—Is oblong in shape, rind dark green, flesh rich red, seeds black, fine grained, solid melon free from hollow centers. Weighing 30 to 35 lbs.

DARLINGTON

86 Days

Darlington is the best for home and local markets, rind too thin for long distance shipping.

FRUIT—Long type melon, gray-green with irregular dark stripes, rind very thin, flesh very tender, luscious, with a distinct and pronounced flavor and aroma. 35 to 38 lbs.

FLORIDA GIANT (Black Diamond) or CANNON BALL, OKLAHOMA CHIEF

95 Days

A large, round melon with black-green, glossy rind. The rind is very thin and tough and can be hauled without damage any distance that any melon can be hauled. They are hardy and resist drought better than any except Kansas King.

FRUIT—Has no stripe, just solid, smooth, black-green. The flesh is blood-red, tender and very sweet. Seeds brownish-black. Ripen in mid-season. 38 to 42 lbs.

EARLY KANSAS SPECIAL STRAIN (Kansas King)

80 Days

A well known melon of high merit, early, of large size and excellent quality. Popular in mid-west for shipping.

FRUIT—Fruits nearly round, slightly longer than broad, deep emerald green color with irregular green stripes, the flesh is stringless and fine textured, bright red and very sweet. Rind medium thick and strong. 35 to 50 lbs.

MUSTARD

FLORIDA BROADLEAF

40 Days

Large leaf, broad oval with white-green mid-rib, spreading to upright, vigorous, slow to bolt. Bright yellowish-green, 10 inches tall.

SOUTHERN GIANT CURLED LONGSTANDING

40 Days

Will stand without bolting for a long time, 10 inches tall, semi-erect to spreading, medium large and hardy. The leaves are a medium dark green with beautiful, finely curled edges.

FORDHOOK FANCY

50 Days

A fine variety with dark green feathery leaves, mild flavor. Makes good quality greens, 15 to 18 inches in diameter, erect, compact and very slow bolting.

FORDHOOK FANCY (Longstanding)

60 to 70 Days

Leaves are slightly smaller and more finely cut and curled than the Southern curled. A very pure stock.

OKRA OR GUMBO

CLEMSON SPINELESS

50 to 55 Days

A fine canning, commercial and garden variety.

PLANT—4 to 4½ feet tall, heavy foliage and productive.

PODS—7 to 9x1½ inches, rich green, straight, ridged, tapered at tip, entirely spineless, good quality.

PERKINS MAMMOTH PODDED

62 to 67 Days

For home, market and canning.

PLANT—3½ to 4¼ feet tall, heavy foliage, very productive.

PODS—7 to 8x1½ inches, bright deep green, straight, slender, ribbed, tapered, fleshy, spined and excellent quality.

DWARF GREEN (Long Pod)

50 to 55 Days

A very early dwarf variety for earliest crop and for use in Northern areas.

PLANT—2½ to 3 feet tall, sturdy, well branched.

PODS—7 inches long, slender, ribbed, dark green.

LOUISIANA GREEN VELVET

60 Days

Similar to Louisiana White Velvet except medium green in color. Fulfills the need for a velvet type.

PLANT—5 feet tall, uniform, sturdy and a very vigorous grower.

PODS—7 to 8 inches in length, slender, straight, smooth, ribless, tender when young and of appealing soft gray-green color.

ONIONS

EVERGREEN WHITE BUNCHING (New Wonder Bunch)

Sown in the spring, this variety produces large green onions early in the summer. It does not form a bulb. The stems are nearly twice as large as ordinary onions and hold in eating condition for a long time. If sown in the fall, and given a little protection, this onion will stand all winter and produce fine, large "green" onions in the spring.

WHITE LISBON (White Bunch)

This variety is very widely planted for table use, or green onions, produces long slender onions, nearly pure white, mild and tender. One of the best for bunching. It is slow to bulb, has a heavy top that stands up well during the summer months.

EXTRA EARLY YELLOW GLOBE

98 Days

Excellent semi-globe shaped and is a good yielder. It ripens well and, under normal conditions, the bulbs are ready for market 10 days ahead of the Southport Yellow Globe. The color is rich deep yellow, skin tough, flesh firm and white. Good keeper.

SOUTHPORT YELLOW GLOBE

110 Days

(Selected strain) This onion produces very heavy yields in good soil. The bulbs are of perfect globe shape and a good deep yellow color. This is the best shaped and best keeper of the Yellow Globe onions. We have an extra selected strain of this variety which produces onions of uniform globe shape and deep yellow color and with very small necks.

SOUTHPORT YELLOW GLOBE, BRIGHAM STRAIN

110 to 115 Days

Preferred by many gardeners for its large yields and keeping qualities. True globe shape, solid, flesh is creamy white, firm and mildly strong; skin is deep yellow, thick and smooth. Grown successfully on muck or heavy soils.

UTAH YELLOW SWEET SPANISH

112 Days

This excellent strain of Utah Sweet Spanish has made a lot of money for our customers in the last five years. It is a development of the well known Spanish variety, Gigantic Gibraltar, and is very similar to Valencia and Denia. The bulb is large, deep globe shape, small neck, yellow skin, white flesh, fine grained, mild flavor. Fair keeping quality.

UTAH WHITE SWEET SPANISH

110 Days

A selection from White Spanish, larger than the old strain. About the same size and shape as the Utah Yellow Spanish. This outstanding, large mild variety, under favorable conditions, often produce bulbs 4 to 4½ inches in diameter, and will produce a heavy yield of perfect shaped white bulbs, either in upland or muck soil. Large globe shape with small neck. Clear white skin, flesh white, fine grained. Very mild and sweet.

WHITE GLOBE or SOUTHPORT WHITE GLOBE

110 Days

This is considered the best of the white varieties. It produces medium to large, handsome, fine globe shaped bulbs. The flesh is fine grained, snowy white and of fine mild flavor. It keeps well for a white variety. The bulbs of white varieties should be gathered as soon as ripe and carefully dried under shelter away from strong sunlight.

WHITE PORTUGAL or SILVERSKIN

100 Days

This is a medium sized onion of mild flavor and with beautiful clear white skin. The variety is a favorite with many for use when young as a salad or bunching onion, and for pickling. It matures about 10 days earlier than White Globe, and is fine for growing sets.

WHITE SWEET SPANISH

110 to 115 Days

Nearly as large as Utah White Spanish. Globe shaped, small neck, skin white, flesh firm and exceptionally mild. Splendid for use in salads or suitable for eating without cooking. A very heavy yielder and a fair keeper. The past season many growers found White Spanish an excellent table or bunching variety.

ONION SET SEED — Any varitey, see prices.

PARSLEY

DOUBLE MOSS CURLED

70 to 80 Days

Plant about 12 inches tall. Vigorous, compact and very productive. The color is rich dark green, with finely cut and curled leaves. One of the best varieties of curled parsley.

HAMBURG or TURNIP ROOTED

85 to 95 Days

The foliage is like parsley, but the plants have edible roots, and flavor is similar to celeriac, used for flavoring soups and stews, and may be stored in sand for winter use.

PARAMOUNT

80 to 90 Days

Plants 12 inches tall, with spread of 20 inches if properly spaced. Leaves very dark green, finely cut and deeply curled.

PLAIN or SINGLE

75 to 80 Days

The leaves of this variety are flat, deeply cut, but not curled. Very desirable for flavoring soups and stews, and for drying. Plant is spreading and long stemmed.

TRIPLE CURLED

75 Days

Plant compact, leaves dark green and so finely cut and closely curled as to resemble tufts of moss. Besides its value for flavoring and garnishing, the plant is decorative. Taller than Paramount, and lighter green, and generally more productive.

PARSNIPS

ALL AMERICAN HOLLOW CROWN

125 Days

One of the best and most popular varieties. Hardy, a vigorous grower, and highly dependable. Super sugary flavor.

ROOT—12 inches long by 3 inches thick at the shoulder, tapering gradually to the tip, smooth and decidedly hollow crowned, flesh white and tender.

THICK SHOULDER HOLLOW CROWN

130 Days

An improved strain of Hollow Crown. The standard sort for home or market gardens. Roots 12 to 15 inches long, 3 inches wide at shoulder, tapering gradually to tip.

SHORT THICK or EARLY MARKET

100 Days

Full month earlier than Hollow Crown. Roots 6 to 8 inches long, $2\frac{1}{2}$ to $3\frac{1}{2}$ inches wide at shoulder, full crowned, rounded at top, small neck. Top only about half as tall as Hollow Crown. Tender, sweet, delicate flavor. Easy to pull.

PEAS

ICER 95 (Western Giant)

73 Days

This is truly a giant podded pea of recent introduction. Its mammoth long, dark green pods, $5\frac{1}{2}$ to 6 inches long, are slightly curved, and the vines, about 26 inches high, producing a bountiful crop. Unlike many varieties of its season, the quality is rich in flavor, and will remain tender and sweet several days after picking.

LITTLE MARVEL

62 Days

The vines of this favorite variety will grow to a height of 15 inches, producing pods $2\frac{3}{4}$ to 3 inches in length, very plump, straight, blunt ended, containing 6 to 8 tender peas of the finest flavor.

PEPPERS

CALIFORNIA WONDER

72 to 76 Days

The leading market garden and shipping pepper, resembling Chinese Giant in shape.

PLANT—24 to 28 inches tall, stocky, foliage dark green. A good producer.

FRUIT—4 to $4\frac{1}{2}$ inches long by 3 inches in diameter, smooth, blocky, and four lobed. Thick walled and sweet. Attractive glossy green fruit becoming scarlet at maturity.

CAYENNE (Large Thick or Finger)

70 to 74 Days

Fruits have thicker flesh than LONG NARROW, 4 to 5 inches long, more smooth, and not quite so pungent.

CAYENNE LONG NARROW

70 to 74 Days

PLANT—24 to 30 inches tall, very erect with bushy top, foliage medium green, unusually productive.

FRUIT—5 inches long by 1 inch in diameter, pendant, very slim, frequently twisted, deep green changing to brilliant red. Flesh very hot.

CHINESE GIANT

80 to 85 Days

An attractive large fruited variety. Unusually large size and sweet mild flavor. PLANT—18 to 22 inches tall, vigorous, stocky, heavy foliage and very productive. FRUIT—4½ inches long by 4 inches thick, pendant, with four round ridges at blossom end, somewhat crumpled. Emerald green turning to scarlet. Thick flesh, mild and sweet throughout.

ILLINOIS F5

58 to 60 Days

Earliest of the large fruited green peppers. Has the quality of bearing fruits continually, under any environmental condition, over a very long season.

PLANT—Compact, heavy foliage.

FRUIT—4½ to 5 inches long, 3½ to 4 inches wide at stem end, 3 and 4 lobed, thick walls. Excellent flesh quality, is sweet and turns crimson red at maturity.

KING OF THE NORTH

65 Days

The first early Ruby King variety developed for the Northern grower.

PLANT—22 to 26 inches tall, erect, very prolific, hardy and vigorous.

FRUIT—4½ inches long by 3¾ inches in diameter, dark green, medium thick mild flavored flesh.

OAKVIEW WONDER (California XXX)

65 Days

An earlier and more productive strain than California Wonder, developed by line breeding. An outstanding strain, unsurpassed for shipping or for the home and market garden.

PLANT—22 inches tall, compact, stocky.

FRUIT—4 to 4½ inches long by 3½ inches wide, blocky, smooth, 4-lobed, very sweet flesh.

OZARK GIANT

80 Days

A large and heavy yielding strain of the Giant type. Fruits similar in shape to the Chinese Giant, but smoother, mostly 4-lobed, and of large size. 4½x4 inches, medium weight.

OZARK WONDER

60 Days

Ozark Wonder is a cross between Ozark Giant and Pride of the Market. Plants are vigorous and upright. Fruits nearly as large as Ozark Giant, 4½x4 inches in diameter, flesh medium thick, deep green, very prolific, often as many as 25 to 30 peppers per plant.

PRIDE OF THE MARKET

66 Days

Pride of the Market is of the California Wonder type, but 10 or 12 days earlier. Early maturing makes it especially suited to Northern growing conditions.

PLANT—Of medium size, sturdy, upright, with abundant green foliage and broad leaves that well protect the pods.

FRUIT—Blocky, 3 to 3½ inches in diameter, 3½ to 3¾ inches deep, nearly round in cross section, with 3 or 4 lobes, glossy dark green. Flesh tender, crisp and always sweet.

SMALL RED CHILI

80 to 84 Days

A really hot variety, used for pepper sauces, pickling, and drying for winter use.

PLANT—18 inches tall, spreading, bushy growth, prolific.

FRUIT—2 to 2½ inches long, ½ inch in diameter at shoulder, slim, smooth tapered, light green becoming dark red when mature, thin fleshed, very pungent.

SUNNYBROOK (Pimento)

73 Days

Ideal for canning.

PLANT—23 to 28 inches tall, erect, unusually productive, branching.

FRUIT—2½ to 3 inches in diameter, 2 inches deep, oval with square shoulder,

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

mostly smooth but occasional ribbing. Flesh medium thick to thick, bright green becoming red, sweet, juicy.

WORLDBEATER NO. 13 (Blight Resistant)

70 Days

Wilt resistant strain, fruits mature early and are large in size.

PLANT—26 inches tall, uniform, vigorous, upright.

FRUIT—4½ inches long, 3¾ inches in diameter, mostly 4-lobed, slightly tapered, medium thick walls, attractive green, bright red at maturity.

YELLOW HOT HUNGARIAN

60 to 65 Days

An early maturing hot yellow variety desirable for home and market.

PLANT—18 to 22 inches tall, thrifty, compact, foliage light green, a heavy producer.

FRUIT—5 inches long by 1½ inches thick at shoulder, pendant, smooth, tapered, waxy yellow turning to crimson when mature.

YELLOW SWEET BANANA

65 Days

Attractive yellow sweet variety of the Cayenne shape.

PLANT—Upright, about 22 inches tall, prolific, dark green, large leaf.

FRUIT—7 inches long, 1½ inches wide, sweet, medium thick wall, light yellow turning to bright red at maturity.

PUMPKIN

CONNECTICUT FIELD

112 to 120 Days

Standard cornfield variety, large pumpkin used for stock feed and canning.

FRUIT—10 to 14 inches deep, 14 inches in diameter, globe shape, skin smooth dark orange, rind thin but hard, surface somewhat grooved.

FLESH—Orange-yellow, coarse, thick, dry and sweet.

KING OF THE MAMMOTHS

115 to 120 Days

This is the largest of the pumpkins.

FRUIT—18 to 24 inches long, 15 to 18 inches in diameter, nearly round to flattened, skin fairly smooth, sometimes slightly netted, dull orange streaked or splotched with buff.

FLESH—Yellow to orange, very thick, hard and firm, while a little coarse and fibrous in texture it is moist and fair quality.

SMALL SUGAR or NEW ENGLAND PIE

105 Days

Early maturing, prolific, good winter keeper. Excellent for canning and the favorite pie pumpkin for home use.

FRUIT—8 inches deep by 10 inches in diameter, slightly flattened to globe shape, skin glossy, furrowed, dark orange, rind hard.

FLESH—Orange-yellow, thick, fine textured, dry, sweet and best quality.

RADISHES

CAVALIER

20 to 22 Days

We have this variety in Domestic or regular Imported stock. Our Greenhouse Special is Transplanted Cavalier.

TOP—Short, very uniform, ideal for forcing or early market.

ROOT—½x¾ inches, oval or olive shape, very uniform, bright scarlet skin, tender white flesh.

COMET 25 Days

Globe shaped bunching or table radish. Suitable for use when 5/8 or 3/4 inches in diameter, but becomes larger without growing pithy.

TOP—Short.

ROOT—Thick, globe shape, scarlet color, small, crisp and solid.

EARLY SCARLET GLOBE, MEDIUM TOP 24 Days

A medium top strain of Scarlet Globe for upland and sandy soil.

TOP—3 to 4 inches.

ROOT—Deep globe shape, skin bright scarlet red, flesh white and crisp.

EARLY SCARLET GLOBE, MEDIUM TOP (Transplanted Stock) 24 Days

Same as Early Scarlet Globe, medium top, except Imported Transplanted stock.

ICICLE 30 Days

The best early variety, popular in home and markets.

TOP—Medium.

ROOT—5 to 6 inches long and 1/2 inch thick or larger, tapered, very white throughout, brittle as ice, mild and fine flavor.

ICICLE, SHORT TOP 27 Days

This variety is desirable for forcing under glass and highly recommended for muck soil.

TOP—Short.

ROOT—Somewhat shorter than Icicle and more cylindrical in shape, early maturing and of fine waxy white color.

SCARLET GLOBE GREENHOUSE FORCING 21 Days

We offer this Greenhouse Special for a forcing radish. This strain is Imported, Transplanted Cavalier stock, and is remarkable for growing on muck and peat soils during summer.

TOP—2 1/2 to 3 inches.

ROOT—Deep olive shape, uniform, bright scarlet skin, flesh white, firm, crisp and mild.

SCARLET GLOBE SHORT TOP 23 Days

A very short top strain of Scarlet Globe bred for greenhouse forcing and summer planting. A dependable bulber.

TOP—2 1/2 to 3 inches.

ROOT—Mostly round, skin rich bright scarlet, flesh crisp and firm.

SOUTHERN MARKET GLOBE 23 Days

A strain of Early Scarlet Globe developed primarily for shippers, has non-bolting tendencies.

TOP—Slightly shorter than those of medium top.

ROOT—Deep globe shaped, skin bright scarlet red, flesh white and crisp.

SPINACH

AMERICA (New) 50 Days

The best longstanding, heat resisting, heavy yielding, savoy-leaved spinach on the market today. A new introduction for 1952.

PLANT—Height 6 to 8 inches, width 10 to 12 inches. Very thick leaved, real glossy dark green, very well savoyed.

ARISTOCRAT

A new longstanding variety for summer crop, leaves curly and dark green.

BLOOMSDALE DARK GREEN, RESELECTED

40 Days

Round seeded. The standard very early sort for home and market garden. Plants upright and compact, attain height of 10 to 12 inches and spread of 12 to 15 inches. Leaves large, blistered and crumpled, rich deep glossy green; and of splendid quality.

LONG STANDING BLOOMSDALE

45 Days

In demand for home and market gardens because of the uniform, handsome plants and remarkable longstanding quality. Resembles Savoy Leaved or Bloomsdale, but it is a trifle later, of more compact habit, a trifle darker green, and remains free of flower stalks about two weeks longer.

NORTHLAND

45 Days

Excellent for canning or freezing, or home and market garden use. An improved strain of the Giant Nobel type. Leaves are thick, very large, smooth and rounded, darker green than Nobel, excellent quality and very productive. Round seeded.

OLD DOMINION

40 Days

Blight resistant. A cross between Virginia Blight Resistant Savoy and King of Denmark. Large, dark green, heavily crumpled leaves. Longstanding and resistant to mosaic. Used mostly for an early crop. Round seeded.

VIRGINIA SAVOY LEAVED BLIGHT RESISTANT

40 Days

This robust variety is especially valuable for its blight resistant quality. The large, dark green leaves of good substance are savoyed and crumpled. It is best suited for late crop and the seed should not be sown before the latter part of August, as the plants have a great tendency to bolt to seed if sown earlier.

SQUASH

BLUE HUBBARD SPECIAL (XXX Blue Hubbard)

110 Days

A new variety obtained by selection from the original Hubbard. The fruit is gray-green color, grows much larger than Hubbard, and keeps remarkably well, as the shell is extremely hard. The shape and appearance of this squash is ideal, weighing from 18 to 21 lbs.

BUTTERCUP

110 Days

Turban shaped. 3½ lbs. Rind thin and tough, dark green with narrow green stripes and slight mottling. Orange flesh cooks sweet and dry. A small thick-fleshed squash of good storage and eating quality.

BUTTERNUT

95 to 102 Days

Maturing an abundant crop in late summer and early fall, this squash has become a leader. Fruit 12 inches long, pear shaped, hard tough rind, skin smooth, light cream-buff. Flesh is dry, light yellow with sweet, nutty flavor. Fairly good keeper.

DENNINGS BLACK STRAIN WARTED HUBBARD

115 Days

Has been bred to meet the requirements of a high class trade. Fruits are of large size, rough skin, dark green in color. Vines are of strong, robust growth. Flesh is bright orange, fine grained, rich and dry. 12 to 15 lbs.

BENNINGS GREEN TINTED

52 to 56 Days

The fruits are the same as Early White Bush, but pale green tinted when young, becoming pale buff at maturing seed stage. Flesh is green tinted white, tender and juicy.

DES MOINES or REGULAR TABLE QUEEN

80 Days

An excellent table or individual size baking squash. Very early maturing, exceedingly productive, more tolerant of poor soil and adverse conditions than most winter types, and a good keeper. Acorn shaped, surface deeply grooved or furrowed, skin smooth, dark greenish-black, sometimes becoming partly yellow in storage. Flesh is medium thick, pale orange, tender, slightly fibrous, dry, sweet and individually flavored.

EARLY PROLIFIC CROOKNECK

50 Days

Very popular in the South, where squashes are picked young. Plants very prolific, fruits curved at neck, light yellow, warted.

EARLY PROLIFIC STRAIGHTNECK

50 Days

New high yielding summer sqash. Plants strictly bush and compact, with ample foliage, permitting close planting. Fruits slender, club-shaped, with a rounded tip, sparsely warted, delicate cream color in edible stage becoming deep golden-yellow at maturity.

EARLY WHITEBUSH SCALLOP

50 Days

This has become the most widely used of the early summer type squash. Fruits uniform, disk shaped with scalloped edges, smooth, green-white when young, white when mature. Flesh green tinged with white, thick, tender, fine grained, juicy and well flavored.

IMPROVED or LARGE TABLE QUEEN

80 Days

The demand for tihs large size Table Queen is growing by leaps and bounds because growers find it the most profitable kind to grow. The fruits have the true pointed acorn shape but are larger than the regular Table Queen, measuring about 6 to 7 inches long and 5 inches across. Attractive dark green color and good quality always demand a good market, and the vines yield tremendous crops.

TOMATOES

BREAK O 'DAY (Super Strain or Improved)

68 Days

This new Break O' Day must not be confused with the older type. Fruits deep scarlet, medium to large, globe shaped, smooth and free from cracking. Heavy green foliage gives good protection against sun scald.

GULF STATE MARKET (Super Purple King)

85 Days

A second early, smooth, pink fruited variety. It is very similar to Globe. Fruits are globe shaped, high crowned, medium size and smooth, very solid and meaty. They set in clusters of from 5 to 7. Unsurpassed by any other pink variety. Should be staked, vines long, somewhat resistant to wilt.

KING OF THE STAKERS

64 to 70 Days

A many purpose variety, extra early and smooth, large. Fruits are large, smooth, globe shaped, bright scarlet and free from cracks. Highly resistant to fusarium wilt. Very productive, as early as Earliana. Has normal vine coverage. Also very satisfactory as a greenhouse tomato.

RUTGERS CERTIFIED (New Bo-Kay)

82 Days

We are sincere in our belief that this is an outsanding main crop variety. It is wilt resistant, and trials show it to be almost free from wilt and cracks. Fruit bright scarlet, medium large, deep oblate, smooth skinned. Its strong, heavy foliage makes it a valuable variety for planting on light soils.

SIOUX

68 Days

A new tomato developed from All Red & Stokesdale at the Nebraska Experiment Station. Plant relatively open, with finely developed leaves. Fruits of medium size, almost globular, thick walled and practically free from hard core, juicy with good acid flavor. This variety possesses the uniform ripening factor.

STOKESDALE CERTIFIED

73 Days

Fruit medium size, smooth and free from cracking, bright scarlet color throughout, solid flesh, good quality and flavor. Ripens from the inside out. Vine medium size with a moderate amount of semi-erect branches covered with heavy, medium green foliage that gives good protection to fruit. A second early variety.

VALIENT CERTIFIED

68 Days

This variety is becoming more popular with market gardeners. A half-brother to Stokesdale. It develops a deep Marglobe type tomato and ripens within three days of Earliana. It is four days earlier and often 2 ounces heavier than Stokesdale. A valuable tomato for market, but not primarily adapted as a canner. Our sales have steadily increased on this variety.

CROWN SET TOMATO SEED

This seed is of the earliest, full fruited, top picked tomatoes of our certified grown fields in Pennsylvania. These tomatoes are selected for uniformity of shape, best color and size. They represent the top best for planting purposes in their own variety. Seeds from these tomatoes have been used for years with the utmost success by market gardeners in many states throughout the country. For complete listing of Crown Set varieties stocked, see price list.

TURNIPS

EXTRA EARLY PURPLE TOP MILAN

45 Days

This splendid turnip is the earliest of the purple top type. The bulbs are flat, medium size, smooth and free from rootlets, with crisp white flesh of excellent flavor. The upper portion of the bulb is a rich purple, while the lower half is pure white.

PURPLE TOP WHITE GLOBE

55 Days

The bulb measures three inches and more in diameter, being a perfect globe form. Flesh white, firm and crisp of mild flavor. An excellent keeper and very productive. This variety is extensively used for market growing, largely used for turnip greens.

PURPLE TOP WHITE GLOBE, SMITH STRAIN (XXX Purple Top White Globe)

58 to 63 Days

Owing to the great amount of care and labor involved in making this the best strain on the market, we are obliged to ask a higher price than for ordinary stock. However, the better price you will obtain for these extra fine turnips will more than offset the small increase in seed cost. Its particular feature is its purple-red top which goes well down on the root. It is a quick growing type, with fine flavored flesh. Keeps well.

SEVEN TOP

Grown in the South for winter greens, the young leafy shoots are tender and produce heavily. The roots are woody, coarse and not edible.

TOKYO MARKET, IMPORTED

36 Days

All white turnip, semi-globe shape, short top, sweet and flavorful. Imported for early planting, when earliness is the main object.

RUTABAGA

AMERICAN PURPLE TOP

90 Days

An old standard variety of high yielding, fine flavor and good keeping quality. Roots are 5 to 6 inches in diameter, globe shaped, skin buff with deep purple-red above the ground, flesh creamy-yellow, firm and of good flavor.

LAURENTIAN

92 Days

An outstanding variety of Rutabaga, smoother, more refined roots than American. The short neck and smooth roots make it very desirable for storage, shipping and canning. Roots are 5 to 5½ inches in diameter, globe shaped, skin buff, dark purplish-red above the ground, flesh light yellow, fine grained and excellent flavor.

GOLDEN NECKLESS

85 Days

Similar to American Purple Top, but having smaller tops and roots with no neck. Roots are 4 to 5 inches in diameter, globe to deep globe shaped, skin buff with purple above the ground. Flesh deep yellow and fine grained.

FLOWER SEEDS

ASTERS

AMERICAN BRANCHING—Very free blooming, producing flowers of broad-petaled type, slightly incurved and very lasting. Double flowers on long stems. Wilt resistant. 24 inches tall. Any color or Mixed—¼ oz. 50¢, oz. \$1.50.

CREGO GIANT BRANCHING—Also known as "Ostrich Plume". Blooms midsummer. Wilt resistant. 24 inches tall. ¼ oz. 50¢, oz. \$1.50.

QUEEN OF THE MARKET—The best early among the Asters. Branching habit. 18 inches tall. Wilt resistant. ¼ oz. 50¢, oz. \$1.50.

ANTIRRHINUM (SNAPDRAGON)

Majus, rust resistant. 28 inches tall. ¼ oz. \$1.50, oz. \$5.00.

BELLIS PERENNIS (ENGLISH DAISY)

This is a very fine, large flowering strain, extra double, with full centered flowers on compact plants. 6 inches high. ¼ oz. \$1.50, oz. \$5.00.

HELICHRYSUM MONSTROSUM (STRAWFLOWERS)

Popular winter bouquet flowers: Canary Yellow — Fire Ball — Rose Queen — Salmon — White — Mixed. ¼ oz. 60¢, oz. \$2.00.

GYPSOPHILIA (BABY'S BREATH)

Gypsophilia CONVENT GARDEN Improved. oz. 25¢, ¼ lb. \$1.00, lb. \$2.50.

MARIGOLDS

When all the other flowers are past their prime, Marigolds will still furnish a wealth of color. The dwarf varieties are ideal for bedding, while the taller types are valuable for cutting. Marigolds are shallow rooters and apt to be blown about unless staked. Oz. \$1.60, ¼ lb. \$5.00.

SWEET SCENTED YELLOW SUPREME

African Orange Ball — African Lemon Ball — African Tall Mixed Double — French Dwarf Double, Orange — French Dwarf Double, Lemon — Sunset Giants Mixed. ¼ oz. 50¢, oz. \$1.50.

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

PETUNIAS

For garden or house culture, few plants equal the Petunia for effectiveness. Beautiful and especially useful for borders, solid beds, window boxes, porch boxes and vases.

HOW TO ORDER AND REMIT

TRANSPORTATION

Prices quoted in this catalog are shipped anywhere in the United States proper by Parcel Post, Express or Freight, our option, all transportation and packing charges paid by us, unless otherwise stated. We do not pay transportation charges on insecticides, fertilizers, implements, rubber bends and twine. All transportation charges will be allowed on settlement of your account with the above evceptions.

TERMS OF SALE

Regular terms are cash with order. We are pleased to open accounts to market gardeners of established credit or who can furnish satisfactory credit references. At least three established credit or bank references are necessary.

ANDREWS-BURRI SEED CO. :- 505 WALNUT, KANSAS CITY, MO.

3% discount allowed on orders of \$20.00 or over on seed only, if paid within 10 days from date of invoice.

ORDERING

An order blank and stamped envelope are enclosed for your convenience. Write your name, post office, shipping point or nearest express office, your county and state. Write amounts and varieties clearly.

HOW TO MAKE REMITTANCES

Remittances may be made by any of the following: Post Office money order, Bank Draft or check, cash in Registered Letter or Express money order.

SHIPPING INSTRUCTIONS

When goods are to be shipped by freight or express give clear shipping directions. The Andrews-Burri Seed Company gives no warranty, express or implied, as to the productiveness of any seeds we sell, and we will not be in any way responsible for the crop. Our liability in all instances is limited to the purchase price of the seed only.

RUBBER BANDS

New Rubber Bands are cheaper and far more handy than twine for asparagus, onions, radishes and other bunching varieties. 7,000 to pound, the larger sizes a trifle less count per pound. We can supply the following sizes: Nos. 8, 10, 12, 14, 16, and 32. Write for prices.

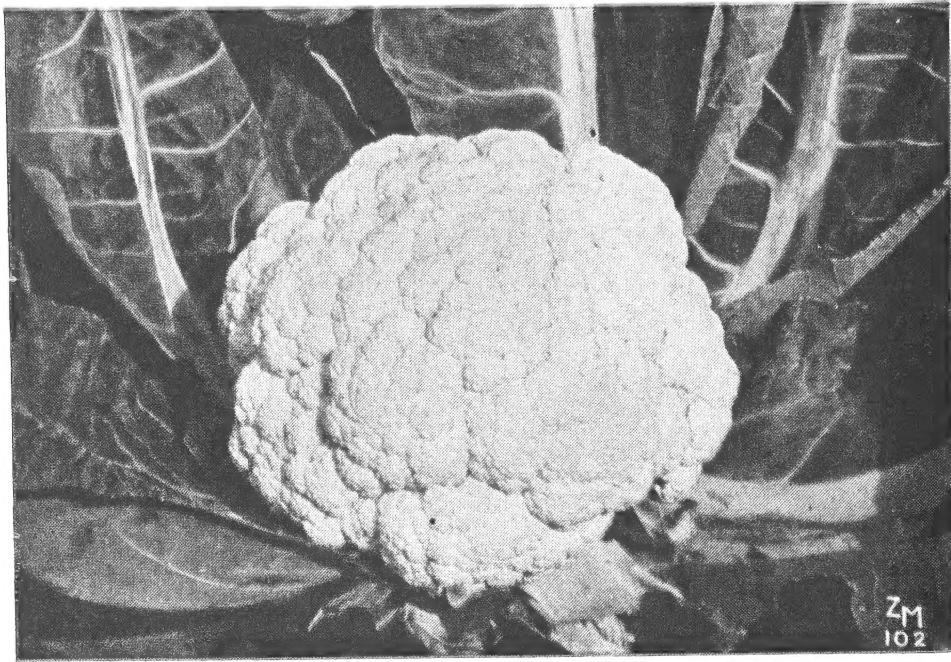

CALIFORNIA WONDER XXX
(Oakview Wonder, Early California Wonder)

An earlier and more productive strain of California Wonder, an outstanding strain unsurpassed for shipping or for the home and market gardeners.

(See Page 18)

WHITE MOUNTAIN

The perfect snow-white Cauliflower for main-crop.
(See Page 7)

SCARLET GLOBE GREENHOUSE SPECIAL (Cavalier)

Our selection of transplanted Cavalier for greenhouse forcing, peet or muck, or any other rich soils that require a short top.

(See Page 19)
